### Appeals.

Utilize the automated appeal index program with index/image printing.

## CASE MANAGEMENT

Our Case Management System, in production since 1988, has a calendar case scheduling utility complete with customized viewing capabilities and email deliveries; which saves time and money and even improves communications. Automatic notice generation within a case and accounting integration reduces errors and improves efficiency. With this program, you can even send cases to appeals court using email, paper, or CD. This system also allows for web-based searches of data from all courts. Today, we have over 60 customers running our Case Management System.

Iron Data delivers solutions to automate governmental workflow, reduce redundant workload, improve efficiency and increase productivity.

## Testimonials:

*"The ability to search for defendants and plaintiffs across multiple court platforms saves us enormous time and makes dealing with the public more efficient."*

- F. Barry Wilkes, Clerk of Superior, State, Magistrate, and Juvenile Court

*"The ease in which we produce and distribute calendars saves us time and creates a more efficient operation. We now email many of the calendars that we used to mail by postal service which of course saves us time and money."*

- Cindy G. Brown, Clerk of Superior and Juvenile Court

*"The ability to have our index information along with our images accessible via the internet allowed several departments that were not on the county network to have access to the information without having to travel to the courthouse."*

- Evonne S. Mull, Clerk of Superior, State and Magistrate Court

*"Being able to electronically transmit our required forms to state agencies instead of filling out hand forms has saved us days of work each month."*

- Gary M. Bell, Clerk of Superior Court
