Balance your ledgers from bank statements.

Jury Selection Reversal.

Reverse a selection if parties plea out and the jurors are no longer needed.

JURY MANAGEMENT

In production since 1988 and with over 50 customers running our Jury Management System, this product is easier to use than ever. You can save time and improve communications by creating unique messages on a jury summons and reduce processing errors with on-demand reporting and document automation. Our rigorous and reliable jury selection algorithms dramatically reduce the risk of an invalid jury pool. Moreover, you can improve customer satisfaction and reduce call volume with management questionnaires and internet jury attendance features.

Iron Data delivers solutions to automate governmental workflow, reduce redundant workload, improve efficiency and increase productivity.

Testimonials:

"The ability to manage the composition of the jury pool in accordance with judicial guidelines was crucial for a county such as ours."

- Dwight S. Wood, Clerk of Superior and State Court

"Being able to track the deferrals from jurors has made our jobs much easier."

- Edward E. Tucker, Clerk of Superior, Magistrate and Juvenile Court

"The fact that this system is both sophisticated yet user-friendly made the decision to switch easy."

- Cindy G. Brown, Clerk of Superior and Juvenile Court

"This system has been serving my needs as clerk for over fifteen years."

- F. Barry Wilkes, Clerk of Superior, State, Magistrate and Juvenile Court
