Provides standard and "wild card" search functions to support timely location of information.

## LAND RECORDS MANAGEMENT

Our Land Records Management is a beacon of time reduction and saving money. A comprehensive web-based document search allows everyone to find what they are looking for quickly and easily. Online E-filing allows closing attorneys to submit documents 24 hours a day, eliminating mailing delays. Reduce potential for error with our double key-in data system. Furthermore, tight integration with our accounting, receipting, and general ledger systems provides payment reconciliation and end of day and monthly reporting.

Iron Data delivers solutions to automate governmental workflow, reduce redundant workload, improve efficiency and increase productivity.
